

Vibeathon Judging Criteria (100%)

Technical (50%)

Criteria	Description	Marks
Functionality & Goal Alignment	The implemented system effectively fulfills the intended purpose by addressing the problem defined in the case study. The core features are functional, relevant, and aligned with the goals.	20%
Effective Use of AI Tools	This criterion evaluates how well AI technologies are incorporated into the project. It focuses on whether AI plays a meaningful role in the development process or the solution itself.	10%
Creativity in AI Application	This criterion assesses the originality and innovativeness of the AI implementation . It measures how creatively the team leverages AI to address the problem statement or create unique value for users.	10%
UI/UX Design & Accessibility	The interface demonstrates a high-quality visual design with an appealing layout, effective use of colours, and well-integrated graphics. It is user-friendly , easy to navigate, and follows universal design principles, ensuring accessibility and inclusiveness for a wide range of users .	10%

Business (30%)

Criteria	Description	Marks
Market Potential & Demand	The proposed solution clearly identifies a specific target market and user segment , demonstrating a strong understanding of user needs and existing pain points . The team provides convincing justification that the problem is relevant and significant, with clear evidence or reasoning indicating real demand and potential market opportunity.	10%
Sustainability & Growth Potential	The solution demonstrates strong long-term viability by considering how the system can be maintained, improved, and supported beyond the hackathon. It shows clear potential for continuous development and scalability , with the ability to adapt to future technological advancements, user needs, and evolving market conditions.	10%
Business Model & Value Proposition	The solution presents a clear and compelling value proposition , explaining why users would adopt or benefit from it compared to existing alternatives. It outlines a feasible business model with a solid plan for generating	10%

	revenue to ensure long-term financial sustainability, supported by a clear competitive advantage.

Pitch (20%)

Criteria	Description	Marks
Pitch Clarity & Engagement	The pitch is clear, concise, and well-structured, effectively presenting a brief problem context , the proposed solution , and its key features within the time limit. It emphasizes strong justification of design choices, clearly explaining why the solution was selected and how it is more effective compared to alternatives. The presentation is delivered with confidence and a compelling narrative that captures attention, maintains audience interest, and leaves a strong, lasting impression.	20%
